

**SAMAANYA PRAJAA PARTY**

# PARTY MANIFESTO

The manifesto focused on three main issues. They are

- 1 Eradication of illiteracy
- 2 Alleviation of poverty
- 3 Prevention of Corruption.
- 4 Grater Emphasis on social development
- 5 Imparting professional skills
- 6 Special protection for agricultural resources

It should also emphasize on the realistic measures on social upliftment of the downtrodden and social suppressed classes of the society as mentioned by the constitution in Fundamental Rights and Directive Principals of the constitution.

Our State, Andhra Pradesh, is with full of natural resources, yet its people are much backward in development. The resource which are belongs to the people are not all fulfilling the needs and interests of the same. Education and Health care are like the unreached bunch of grapes to our citizens. Poverty in addition to illiteracy making most of the village folk to remain under-developed only rich people are availing facilities provided by the Government and private organisations well.

Governments are changing frequently but not the mode of live of the people. They are failing totally in giving social, moral and monitory support to their own citizens. Now the down trodden and poor must be uplifted and making them as part of the development of the state is the need of the hour. But dramatically no such signs of them are seen in near future.

Most of the political parties in our country are merely practicing vote bank politics. These parties are dividing the people on the bases of castes, creed, religion, and place and enjoying the worst side of their play. It is most likely that to make the financially backward people across party lines unite and to agitate against the present day politicians to attain over all change in the society. Governments often announce that they are spending cores of rupees on the medical and health sector but truly they are not materializing in practice.

In this way our citizens are meted with injustice and are becoming hopeless towards the polices of the political parties. These parties which are in power are giving much more importance to the private and corporate sectors, the motive not at all traced in case of public sector. In these circumstances, even though the capable people also cannot become alert towards active politics. They must have their own will in improving their academic facilities and activate their own abilities and accustomed themselves to the present day societal atmosphere.

To make sure of the above vision, every civilian must be literate, so that to make sure of their personal growth and development regarding their education, health and employment. The future of youth is that much important in view of developing the modern society. It could be easier for a young citizen to make sure of his employment, if the I.T Sector in the state is deep rooted. So youth are focusing on the technical education but there are no jobs to qualified persons. There is necessity for the government in giving mandatory support to a highly educated technician to get infinite service from him.

Economic development is possible in any country only when the citizens are educationally and financially sound. Unfortunately neither the Central nor the state Government is taking steps in this regard. The programmes that are implemented by the government are restricted only to the political and rich people. Academicians from poor families are not being supported solemnly by the administrators.

The common man is not looking on the political side, because the present parties are created the system that the common man cannot contest for any post in the politics, because the person who wants to contest must have some money to spend and also he is to be having the mind of corruption, so the common man who is having ideology to develop the state/ country by participating in the politics for these people only this SAMANYA PRAJA PARTY come into existence.

We request all our people to join as member and support by encouraging or by monetary support and interested to contest in the elections to protect the common man, there is a lot of chance to prevent corruption and scams. Hence that the allotment of funds by the Government to reach the common man.

Don't forget this is our country, our responsibility to protect the rights of the citizen of our country.

### **What is the need of this party**

Even in the years of Past attaining independence the percentage of people corrupting, was been very low. Now after 66 years this percentage reached to 200%. and more. So the people of Andhra Pradesh are suffering more to enjoy their lives equally to others as constitution provides. So the people of Andhra Pradesh are thinking about a New Party which is corruption free and owed to prevent corruption.

For the past two years millions of common Indians came out on streets to fight against the biggest evil in our country today - corruption. This people's anti-corruption movement has exposed the ugly and greedy face of our politicians. No political party in India today works for the common man's needs.

The people of Andhra Pradesh after seeing the Scams in coal, 2 G spectrum and so many other scams , are worried about the future generation because the poor became very poor and the rich are becoming the richer on the expenses of the poor. Just imagine almost all political parties spend nearly 3 to 10 crores of Rupees to contest as MLA and MP's , they always think about to earn crores of rupees by doing corruption. So We are established this party to attain the corruption free society by making the common people a part of this SAMAANYA PRAJA PARTY.
